HYDRAULIC PRESS MACHINES

High-speed Die-cutting Machine - 3 Tons

The Hydraulic Progressive Die Cutting & Embossing Press - 3 Tons is designed for jewellery progressive design production, allowing cutting and embossing in a single die operation. This compact machine is ideal for light-duty and high-precision jewellery components, offering consistent quality with efficient production speed.

Product Features

- Progressive die system for cutting & embossing in one operation
- High-speed die cutting for efficient production
- Compact and space-saving design
- Smooth and stable hydraulic operation
- Suitable for intricate jewellery components

Published Specifications

Machine Type	Hydraulic Progressive Die Cutting & Embossing Press
Application	Jewellery Progressive Design Production
Max. Working Thrust	3 Tons
Max. Working Pressure	150 Bar
Useful Stroke	80 mm
Working Speed	25 – 30 / min
Bolster Plate Size	255 × 350 mm
Electric Motor	2 HP
Oil Tank Capacity	20 Litres
Construction	Compact Heavy-Duty Design
Machine Weight	Approx. 215 Kgs
Duty Cycle	Continuous Operation
