HYDRAULIC PRESS MACHINES

Hydraulic Cutting Press - PLC Controlled, 20 Tons

The Hydraulic Cutting Press - PLC Controlled, 20 Tons is a compact and efficient machine designed for precise and consistent cutting of Jewellery components. Delivering 20 tons of cutting force, it ensures clean edges and uniform output, making it ideal for high-efficiency production of custom shapes and intricate designs.

Published Specifications

Machine Type	Hydraulic Cutting Press
Control System	PLC Controlled Operation Panel
Max. Working Thrust	20 Tons
Max. Working Pressure	200 Bar
Useful Stroke	80 mm
Working Speed	20 – 33 / min
Bolster Plate Size	420 × 370 mm
Electric Motor	3 HP
Oil Tank Capacity	30 Litres
Application	Jewellery Piece Cutting
Cutting Accuracy	High Precision
Construction	Compact Heavy-Duty Design
Machine Weight	Approx. 325 Kgs
Duty Cycle	Continuous Operation
