HYDRAULIC PRESS MACHINES

Hydraulic Stamping & Cutting Press - Multipurpose, 40 Tons

The Hydraulic Multipurpose Press - 40 Tons is designed for jewellery production units, offering a versatile solution for bangle sizing, ingot stamping, hallmarking, bar cutting, pendant pressing, and paper impression marking. This machine delivers stable and uniform pressure, ensuring precise and consistent results across multiple applications.

Product Features

- Bangle sizing
- Melted gold & silver ingot stamping
- Hallmarking symbols and logo impressions
- Gold & silver bar cutting
- Paper impression and marking
- Pendant and custom jewellery pressing

Published Specifications

Machine Type	Hydraulic Multipurpose Press
Application	Jewellery Production (Multi-Use)
Max. Working Thrust	40 Tons
Max. Working Pressure	315 Bar
Useful Stroke	75 mm
Working Speed	5 – 7 / min
Bolster Plate Size	260 × 160 mm
Electric Motor	3 HP
Oil Tank Capacity	45 Litres
Construction	Heavy-Duty Industrial Design
Machine Weight	Approx. 415 Kgs
Duty Cycle	Continuous Operation
